

FEMP *First Thursday* Seminars 2.0
Renewable Energy
Promotional Summary

In continuation of its second season of ***First Thursday Seminars***, the Federal Energy Management Program (FEMP) will host a live webcast about renewable energy applications at Federal facilities on May 5, 2011 from 1:30 pm to 3:00 pm. During this free 90-minute broadcast, instructors Anne Crawley, Team Lead of the Renewable Energy Technology program at FEMP, and Dr. Andy Walker, Principle Engineer at the National Renewable Energy Laboratory (NREL), will walk through requirements and best practices for utilizing renewable energy at Federal facilities. In specific, the presenters will discuss Federal mandates, recent trends, and developments related to renewable energy; screening tools, services, and performance and cost calculators available for project planning; site evaluations for renewable energy systems; integration of renewable technology into existing systems and new construction; and options for purchasing Renewable Energy Credits (RECs). To register for or learn more about participating in this no-cost *First Thursday* seminar, visit www.femp.energy.gov/firstthursday.
